Role Description
Treasury Technology are responsible for the design, build and operation of DB's Treasury trading, balance management and Liquidity Reporting ecosystem. In partnership with the Treasury business we look to deliver technology solutions that enable organizational liquidity management and efficiencies. We currently have a significant regulatory agenda to deliver that includes some of the top 50 programmes in DB.

Focuses on business outcomes, starting with the goal in mind ('works from the right') with the ability to create strong relationships between the business and teams
Is passionate about using technology to realize the future of the business
Innovates for the business, bringing new ideas and technologies
Continuously improves through life-long learning
Is passionate about improving our products, our ways of working, each other and ourselves through continuous improvements
Is seen and see as a pleasure to work with
Has strong ideas & vision, weakly held with the ability to be flexible
Values bias for action using safe-to-fail experiments
Believing in collaboration above all
Values the whole / team rather than the part
Believes in and trusts the combined power of teams and team of teams
Creates trust in all directions
Believe in creating psychological safety in all directions
Is passionate about owning the full software life cycle from initiation to production with agile & XP working practices and a DevOps mindset. Automate, Automate, Automate!

What we'll offer you
As part of our flexible scheme, here are just some of the benefits that you'll enjoy,

Best in class leave policy.
Gender neutral parental leaves
100% reimbursement under childcare assistance benefit (gender neutral)
Sponsorship for Industry relevant certifications and education
Employee Assistance Program for you and your family members
Comprehensive Hospitalization Insurance for you and your dependents
Accident and Term life Insurance
Complementary Health screening for 35 yrs. and above

Your key responsibilities

Work with our clients to deliver value through the delivery of high quality software within an agile development lifecycle.
Define and evolve the architecture of the components you are working on and contribute to architectural decisions at a department and bank-wide level.
Bring deep industry knowledge into the Feature Team to understand problems, leverage design patterns, automation to support a CI and CD pipeline to production and support emergent design within the agreed domain target architecture.
Contribute to the wider domain goals to ensure flow, consistent standards and approach to software development while designing to a common shared framework.
Comfortable navigating urgency, ambiguity, and fast-changing priorities.
Work with the right and robust engineering practices.
Solid software engineering background and comfort working with data and full-stack teams.
Experience with cloud platforms (GCP, AWS, Azure).
Additionally the role will include leadership responsibilities, such as:
Leading and collaborating across teams
Team management
Mentoring and teaching
Discovering new techniques and helping others to adopt them
Leading by example.

Engineering Experience

Strong programming skills in Java (preferred), with experience in Python, Scala a plus.
Experience developing back end components including real time report generation, batch processing and integration with downstream systems
Strong performance tuning capabilities
Experience in high volume data processing / ETL using Java.
Experience working with Relational Databases – ideally Oracle Exadata.
Experience working in an Agile based team – ideally Scrum.
Big Data Framing and Analysis
A track record of building scalable and maintainable applications.
An understanding of stream based processing
A thorough understanding of quality assurance principles
Good working knowledge of the use of JIRA / Defect Management tools
Good working Knowledge of Software Versioning. i.e. Git Flow
Experience working in a test driven development domain
Good Understanding of Automated testing tools (Rational Robot, Silktest, WinRunner, HP UFT, QuickTest Pro, RIATest, Green Hat etc)
Knowledge of white/black box level testing, system and performance testing of applications using industry standard practices and tools

Your skills and experience

Technical Experience
Mandatory Skills
Java
Spring.
Programming Languages : Java, Python
Familiarity with Spark Streaming and Spark SQL
Elastic MapReduce
Data frames and Datasets
Impala/Hive
Hadoop/ Big Data technologies
Continuous Integration (ideally TeamCity)
Experience working as working with an agile delivery approach – ideally Scrum or Less
Strong experience in software development processes, models, lifecycles and methodologies
Comfortable in Maintaining & Executing Tests using JUnit
Good understanding of ETL Testing

Desirable skills
Oracle and PL/SQL
Reactive patterns
Test Driven Development
HTML 5 / CSS 3
JavaScript and JavaScript based UI libraries including Angular.js
Ability to Run / Execute Reports / Create Ad-Hoc Reports in Business Objects / Tableau
Team management
Proven ability to leverage AI tools to enhance productivity, optimise workflows to solve business problems, while applying critical judgment to ensure responsible and ethical use of data and AI outputs.

Education/Qualifications
Degree from an accredited college or university (or equivalent certification and/or relevant work experience)

Personal Qualities
Ability to work in a fast-paced environment with competing and alternating priorities with a constant focus on delivery.
Logical & structured approach to problem-solving in both near-term (tactical) and mid-long term (strategic) horizons.

Excellent verbal and written communication skills
Capability to guide and influence decision making with business stakeholders.

Industry/Domain Experience/Desirable

Hands-on knowledge of enterprise technology platforms supporting the Finance, Risk and Treasury domains would be an advantage. For example:
Knowledge of the Finance/controlling domain and end-to-end workflow for a banking & trading business.
Knowledge of Treasury: liquidity, funding, capital and collateral; and their management in a large financial institution.
Knowledge of investment banking, sales & trading, asset management and similar industries is an advantage.

How we'll support you

Training and development to help you excel in your career.
Coaching and support from experts in your team.
A culture of continuous learning to aid progression.
A range of flexible benefits that you can tailor to suit your needs.
